The large quantity of land shown for some of the Electoral Districts in cities and towns, is explained by the fact that inhabitants of those Districts entered in their Census Forms properties belonging to them elsewhere, which would not have been returned at all if they had not been so included.

*The addition of the figures shown in No. IV, for the Chatham Islands, will make these totals agree, except in fractions, with the totals given in that Table.
†The "Totals under Crop," in each line, differ from the correct addition of the preceding figures by the numbers under the heading "Hay (mown)," which are again given under the heading "Sown Grasses including Land in Hay."
