Total Mileago completed, and now ready for Packhorse Traffic.			Miles.	83	

This section is from Runanga to Tapuacharuru. The work has been performed by Native contract labour under the Chief Poilipi.

(B.) Bridges. Superstructures are trussed beams with iron tension rods. Spanning Rangitaiki on dray track, and Waipunga upper crossing on bridle track, respectively in length forty and thirty-five feet. Ferry is intended for Waikato, and is to be on the same principle as that at Mohaka.

works I have no returns, but have stated what I consider them to be worth. Natives have not been employed otherwise than as stated in column A. The item £450 includes £150 due but not yet paid. Other persons are men of my own party who have been employed in forming bridle track. Principal work involved has been side cutting, bush clearing, and erection of culverts and small bridges. The Mohaka Ferry has also been re-established and maintained for twelve months at a cost of £122 16s. This sum is not included in column c. The twenty-one miles must be understood to include five miles of permanent track formed,—the remainder of distance having been (c.) Constabulary stationed at Runanga have opened dray track from that place to end of Polihipi's contract, a distance of four miles,—a few cuttings were only necessary to accomplish this. Constabulary from Te Haroto and Tarawera restored about, twenty chains of bridle track which had been washed away by floods. Of the cost of these improved only and maintained for the past year.

(b.) Dray track included in A., and bridle track referred to in c.
(c.) Cost of Native contract (less £150), Constabulary work (approximate), and labour performed by Other Persons. The latter item does not include provisioning of men, transport of tools, or cost thereof: of these items I have no record or accounts.
(c.) Works referred to in column B.
(d.) Referred to in column c.

* Dray track. Side cuttings, embankments, scrub clearing, and levelling. Portions only temporary, but where cuttings are heavy, may be said to be permanent. Bridle track, five miles permanent. Bridges, when erected,

permanent.

(1) Two other foremen were employed, each at different periods: one of them was drowned. Their duties were principally to supervise works pertaining to telegraph and blockhouse erection, &c., and it was only occasionally they were required for road work. The item £47 16s. is included in column x. Supervision has also been afforded to rarious defence and road works by the telegraph linemen, which is not included. + Dray track (considering season) in fair order,—will answer immediate requirements. Bridlo track in bad state owing to wet weather and heavy traffic,—will not meet requirements of traffic.
