

1883.

NEW ZEALAND.

THE ANNUAL SHEEP RETURNS

FOR THE YEAR ENDED 31st MAY, 1882.

Presented to both Houses of the General Assembly by Command of His Excellency.

Mr. B. P. BAYLY to the Hon. the COLONIAL SECRETARY.

SIR,—

Wellington, 31st July, 1883.

I have the honour to submit the annual sheep returns for the year ending the 31st May, 1882. The total number of sheep in the colony on that date was 12,408,106, as against 12,190,215 for the previous year, or an increase of 217,891. In the Napier, Wellington, and Canterbury Districts the numbers have increased most. There are also 207 more owners, making a total of 7,064.

It will be seen that a decrease has occurred in Otago, although the breadth of improved lands is greater. This is undoubtedly due to the rabbit pest, and the consequent abandonment of several runs. At the same time it must be borne in mind that these figures only represent the number of sheep on the 31st May, 1882, or at a time when the ravages of the pest were most severely felt, and the active operations compelled by present Rabbit Act had not become law.

The classification of sheep in the colony can approximately be taken as follows: Long wools, 988,879; cross-breds, 4,098,735; merinos, 7,320,492: total number, 12,408,106. Exported, 2,000; imported, 177; boiled down, 40,095; used at preserving works, 103,154.

The tabulated form attached hereto shows the number of sheep in each county, as well as the number of infected sheep in each district.

It will be seen that a reduction of 328,801 sheep on the infected list has been effected during the year ending the 31st March, 1883. Of the 206,584 still infected, 171,600 are depasturing in Marlborough, 30,810 in the North Island, and 4,174 in the Nelson District. The largest number of infected sheep are within the Kaikoura Subdivision.

The reduction may be attributed to the vast amount of fencing that has been erected during the past three years. Where these steps have been taken the result has in all cases been satisfactory; at the same time this very fencing has excluded in places large blocks of inaccessible country upon which sheep still exist, and for some time to come (as late events have proved), we may expect occasional outbreaks until these areas are thoroughly cleared of wild sheep; yet, any outbreak that may occur cannot spread now with the same facility as hitherto, but in nearly all cases be stopped at once.

There are a few exceptions to the general efforts to fence throughout the colony, notably in the Kaikoura Subdivision, where there are two runs on which no boundary fencing has been erected, and under existing circumstances no finality can possibly be anticipated towards the extermination of scab, and ultimately some special steps other than provided by the Sheep Act will be required to deal with these areas. I am of opinion that with several runs the only real solution to the question will be the destruction of stock running thereon, and a period of three or more years allowed to elapse before being restocked.

It may be worth while remarking that up to September, 1882, certain sections of the Act were suspended in the Marlborough District, and from that time the Act has been in full operation; consequent upon this, proceedings have been taken against several Kaikoura owners, under section 23, and verdicts obtained against them.

I am further of opinion that an alteration is absolutely required in section 45 of "The Sheep Act, 1878." The word "negligently" having been introduced renders many convictions for scabby sheep straying or allowed to stray almost an impossibility. Several cases have come under my notice lately where scabby sheep have actually strayed and infected clean neighbouring flocks, while at the same time the owner of these scabby sheep had obtained and held a clean certificate for

his flocks. The erasing of this word from this section would compel the owners of scabby sheep to keep them at home, and, further, would make them feel more responsible as the owners of scabby sheep than they are, while the word "negligently" allows them a loophole to escape. And, as during the last two years such efforts have been made, and with fair results, scarcely too stringent measures can now be taken to stamp out scab. I consider that section 45 is the most important in the whole Act in dealing with infected sheep, and was intended so to be, but the insertion of this one word has deprived it of a greater portion of its utility.

The provisions of section 26 are apparently incomplete; an addition is required which would prevent an owner of infected sheep from increasing the number of his flock, by purchase, so long as he came within the definition of section 5 subsection (7).

I would further draw attention to the unworkable nature of section 68. To carry it out in its integrity, especially in clean districts, should owners decline to dip for lice, when so instructed by the Inspector, the only resource open to him is to put in force all the provisions of the infected clauses.

During the last twelve months the frozen-meat trade has been initiated. This will undoubtedly create an outlet for surplus stock, as well as cause a demand for, and give an impetus to, the production of half- or cross-bred sheep, these having been found the most suitable for the Home market.

I have, &c.,

BENJN. P. BAYLY,

Superintending Inspector.

The Hon. the Colonial Secretary, Wellington.

A.

RETURN showing (in Totals under Counties)—

1. The Sheep Districts into which the Colony is divided for the Purposes of "The Sheep Act, 1878."
2. The Area of such Districts.
3. The Number of "Infected" Sheep in each District.
4. The Number of Sheepowners in each District.
5. The Number of Sheep upon which the Sheep-rate is collected.
6. The Amount of the Sheep-rate in each District.
7. The Number of Inspectors of Sheep, Cattle, and Rabbits, and Registrars of Brands, residing in each District.
8. The Amount payable for Salaries and Allowances in each District,
