Three years at least should be given to erect and get into working order the explosive manufactories, as acid-works would have to be erected in connection with them, and the greater part of the machinery would have to be expressly made in England. The gun-cotton plant would alone cost over £20,000, independently of the ground and the employes' houses.
Fish-canning	Oct. 23, 1884	J. Wilson, Litchfield Street, Newton	Claims any bonus that may have been offered for this industry.
Glassmaking	— 1881	Hon. Colonial Secretary. <i>Vide Hansard</i> , Vol. XL., page 79	Correspondence relative to it took place with E. Smethurst, Kaiapoi, 16th January, 1882; J. Hydraulic Lime (Mahurangi)	Oct., 1884	..	£2,000 ..	J. Wilson and Co., 75, Queen Street, Auckland	Petitioned Parliament for a bonus on their works, but were refused on the ground that numerous limeburners were already established in the colony.

The application was refused.
Quicksilver ..	Aug. 29, 1882	20 tons ..	£500 ..	Mr. Hobbs, M.H.R.	This was put as a question in Parliament. The Hon. Mr. Dick said he had looked into the matter, but could find no justification for the granting of such a bonus.

CONDITIONS.

The following are the various conditions subject to which the bonuses mentioned in the foregoing table were offered :—

PIG-IRON AND WROUGHT-IRON.

In the event of more than one claimant giving such notice, not more than seven-tenths of the bonus may be claimed by the first producer, and not more than three-tenths by the second producer ; but, if only one claimant becomes a producer on the above conditions, he may claim the whole of the bonus.

The iron in respect of which any bonus is claimed will be examined by an officer to be appointed by the Government, who may require the production of *bonâ fide* account sales of quantities not less than 100 tons weight, showing that such iron has been sold at a fair market price as pig-iron or wrought iron.

GUNPOWDER.

The Government are prepared to receive proposals from any person willing to establish a factory for the manufacture of blasting and sporting powder. The proposer to state what amount of bonus he would require to induce him to undertake the manufacture.

The place where the factory is to be erected to be subject to the approval of the Government, the plans and specifications of the building to be also approved by Government.

All the internal fittings and the arrangements for carrying on the manufacture of the gunpowder to be subject to the inspection of an officer appointed by the Government.

BUTTER, CHEESE, AND MEAT.

A bonus of £500 will be given for the first 25 tons of butter or the first 50 tons of cheese (produced in a factory worked on the American principle, and to which factory any farmer, subject to certain conditions, may send his milk), which shall be exported from New Zealand, and sold at such prices in a foreign market as shall show that the articles are of fair quality.
