

No. 85.]

For Classes D and E, and for Junior C.S.

NEW ZEALAND.—EDUCATION DEPARTMENT.

CERTIFICATE AND CIVIL SERVICE EXAMINATIONS.

1904.

PERSPECTIVE.

Time allowed: One hour and a half.

Draw the perspective representation of the Maltese cross, the plan and elevation of which, drawn to a scale of $\frac{1}{2}$ inch to 1 foot, are given below.

The cross stands on the ground plane with the corner A 4 feet to the right of the spectator, and 4 feet behind the picture plane; the edge A B recedes to the right at an angle of 30° to the picture plane. The eye of the spectator is to be 12 feet by scale in front of the picture plane, and 5 feet above the ground plane. Scale, $\frac{1}{2}$ inch to 1 foot.

[N.B.—All the necessary construction lines must be shown.]
