Session II. 1906. ZEALAND. NEW

ANNUAL REPORT

OF THE

GOVERNMENT. INSURANCE COMMISSIONER

FOR THE YEAR ENDED 31st DECEMBER, 1905.

Presented to both Houses of the General Assembly pursuant to the Provisions of the Acts relating to Government Life Insurance.

Government Insurance Office,

Wellington, 1st June, 1906.

I HAVE the honour to submit the following report upon the business of the Department for the year ending the 31st December, 1905. The Revenue Account, Balance-sheet, and Statethe year ending the 31st December, 1905.

ment of business are appended.

ment of business are appended. New Business.—During the year 3,861 proposals were dealt with, for the assurance of £891,486, and the number of policies actually completed was 3,098, assuring £716,021, being £21,465 in advance of the new business for the previous year. The annual premiums on new policies amounted to £23,502, in addition to single premiums for £537. Eighteen annuities were also granted, on which the purchase-money amounted to £7,756. The result was a net increase for the year of 936 policies for £208,754, against £199,300 in 1904 and £163,690 in 1903, a progressive state of affairs which, as I have before pointed out, indicates permanency in the business obtained by the Department.

£163,690 in 1903, a progressive state of affairs which, as I have before pointed out, indicates permanency in the business obtained by the Department.

The Department has now on its books 44,809 policies, for the assurance at death or maturity of £10,468,316 (and £954,751 bonuses*), together with 328 immediate and deferred annuities for £49,305 per annum; the whole bearing an annual premium income of £319,221.

Civil Service Section.—In the Civil Service section, included in the foregoing total business, there are 730 policies, assuring £110,883 (and £2,348 bonuses†), and entitling the survivors, at age 60, to annuities amounting to £34,758. The annual premium income of this section now amounts to £5.811. now amounts to £5,811.

Income.—The income of the Department for the year has been £321,759 for premiums, and £169,153 for interest, making, with other receipts, a total of £490,925, which represents an increase of £10,209 upon the total income of the previous year.

The income from interest shows a considerable increase, and the average rate of interest realised on the total funds has risen from £4 8s. 2d. per cent. in 1904 to £4 10s. 4d. per cent.

Outgo.—During the year 361 policies became void by death, for claims amounting to £120,690, being £20,269 less than was paid on this account in 1904, and considerably less than the amount provided for in the tables of mortality used by the Department. Three hundred and eleven policies matured during the year, the total claims in this respect amounting to £82,230, as against £80,241. Here again, as I have before intimated, the increasing yearly amount payable on endowment assurances maturing is a testimony to the permanent nature of a class of business whose progressive popularity proves that it meets the requirements of the people more effectually than any other form of assurance.

The total amount paid by the Department, since its foundation thirty-six years ago, in respect of death claims and matured endowments, has been £2,995,204.

The total expenditure, including taxes, commission, and triennial investigation expenses, amounted to £63,829. The ratio of expenses (including the land and income tax) to total income now stands at exactly 13 per cent.

Accumulated Funds.—The total increase in the funds during the year amounted to £163,947, of which £6,953 was used to increase the investment fluctuation reserve, which now stands at £63,809. All the investments of the Department have been subjected to the usual triennial

^{*} Since increased to £1,257,661 by the recent division of profits. recent division of profits.

[†] Since increased to £4,963 by the

scrutiny, and the additions to the investment fluctuation reserve have been made upon a basis which it is believed will, in accordance with the established practice of the Department, maintain the reserve in advance of all requirements. The balance of £156,994 has been added to the assurance, annuity, and endowment funds, which now amount to £3,822,577. The following short statement will give some idea of the growth of the Department, in this and other respects, during the past fifteen years:—

		Polic	ies in Force	Revenue	Accumulated	Ratio of Total Expenses		
Y ear.	Number.	Tumber, Sum Assured. Bonuses. Annuities Premium Income.			from Interest.	Funds.	(including Taxes)	
1890 1905	28,102 45,137	£ 7,544,030 10,468,316	£ 263,762 954,751	£ 5,669 49,305	£ 223,610 321,759	£ 89,796 169,153	£ 1,715,193 3,822,577	Per cent. 16·5 13·0
Improvement in 15 years	17,035	2,924,286	690,989	43,636	98,149	79,357	2,107,384	3.5 (Decrease).

The Balance-sheet.—On the 31st December, 1905, the total assets of the Department amounted to £3,927,804, and were invested as shown in the following comparative statement:—

At 31st De	cember, 1904.	•		At 31st December, 1905.						
Amount.	Percentage of Total Assets.	Class of Investment.	Amount.	Percentage of Total Assets.						
1,966,913 667,950 660,262 135,768 123,580 102,383 103,659 1,004	52.3 per cent. 17.8 " 17.5 " 3.6 " 3.3 " 2.7 " 2.8 " 0.0 "	Government securities Loans on policies Local bodies' debentures Landed and house property Miscellaneous assets		£ 2,132,039 667,965 679,493 154,334 122,436 103,119 67,614 804	54.3 per cent. 17.0 " 17.3 " 3.9 " 3.1 " 2.7 " 1.7 " 0.0 "					
£3,761,519	100'o per cent.	Total		£3,927,804	100'0 per cent.					

It will be seen that there has been an increase of £18,566 in local bodies' debentures, and an increase in loans on policies of £19,231, which is smaller than usual, and is suggestive of easier financial conditions enabling more policyholders to avoid trenching upon their life-insurance accumulations. Properties acquired by foreclosure have virtually disappeared from the balance-sheet, the small amount shown being the balance due on a property sold on terms, which at the date of this report has been actually liquidated in cash. The Department now stands in the highly gratifying position of having no foreclosed properties on its hands. The asset which shows the greatest advance is that of mortgages on freehold property, which has

stands in the highly gratifying position of having no foreclosed properties on its hands. The asset which shows the greatest advance is that of mortgages on freehold property, which has been increased by £165,126, and is now well into the third million.

Triemial Investigation.—The valuation of the Department's liabilities on the 31st December last was completed early in the present year, and the full particulars are contained in the Actuary's report. After applying the severe test of a strict net premium valuation on the basis of Hm $3\frac{1}{2}$ per cent. there was found to remain a surplus of £195,881 over and above the liabilities valued at £3,626,695. Of this surplus £16,887 was carried forward as a reserve against possible future fluctuations, and the sum of £178,994 was applied to provide bonus additions to all participating policies. The individual bonuses were allotted by the compound-reversionary-bonus method introduced three years ago, which has given general satisfaction. The total reversionary bonuses allotted amounted to £302,910, and policyholders in the General Section received larger bonuses than at the previous investigation. It is a matter for regret that on this occasion it has been found necessary to allot somewhat smaller bonuses to the Temperance policyholders than at the last distribution, not because there was not sufficient surplus available on the Department's business as a whole to provide increased bonuses for them also, but because the Department is obliged by law to distinguish between the mortality profit derived from the separate sections, General and Temperance. An honest effort (extending over twenty years) has been made to give abstainers the benefit which they claim as their due on account of superior vitality; but unfortunately this intention has been frustrated by the small amount of support given to this separate section and by one or two other subsidiary causes not necessarily associated with the mortality of the Temperance Section, in respect of which there is, as will be
