

**An Adjuvant to, or Substitute for, the Mother's Milk.**

---

# The 'Allenburys' Foods.

THE "ALLENBURYS" MILK FOOD, on the addition of water as directed, forms an accurately estimated humanised milk, and may be given to the infant at the same time as the mother's milk. It has been proved by clinical experiments to be as easy of digestion as human milk. No digestive disturbance is caused by giving alternate feeds from the breast and the "Allenburys" Feeder. Weaning can therefore proceed gradually with comfort—both to mother and child. In addition to the above, the "Allenburys" Milk Food No. 1 is free from all fermentive and pathogenic organisms. It is slightly alkaline, as mother's milk, and has not suffered the acid decomposition which so usually affects cow's milk, and is the cause of so much digestive and other trouble.
