# Sphagnol

## PREPARATIONS

by the Institute of Hygiene, London.

What is Sphagnol? It is an antiseptic distillate obtained from Peat. 10% to 15% of this distillate added to soaps, ointments and suppositories, making them valuable remedies in cases of ECZEMA, ULCERS, PSORIASIS, RINGWORM, ACNE, DANDRUFF, PRURITIS, HERPES, and HÆMORRHOIDS.

Here are a few reports from practitioners —

“ I am glad to inform you that I have obtained most excellent results in a case of Eczema, effecting the entire body of an infant aged 9 months, by the application of Sphagnol Ointment.”

“ Have had very satisfactory results in chronic skin effections through prescribing Sphagnol Soap, one case of Psoriasis of four years' standing which had resisted previously all forms of internal and external treatment, was cured in less than three weeks by using the Soap.”

“ I congratulate you about your Ointment ; I used it in the case of an old lady who, for twelve months, suffered from Psoriasis of the scalp, attended with distressing itching as well as active inflammation. Other Ointments failed to relieve.”

The originals of all testimonials are available at any time, and by permission of the Sphagnol Proprietors, can refer practitioners to distinguished specialists and medical men if desired. SPHAGNOL, a distillate of Peat, is antiseptic, possesses remarkable healing properties, and is easily applied.

A Doctor's outfit of Sphagnol preparations, consisting of Ointments, Soaps, and Suppositories, will be sent to any Doctor or Nurse on request.
