

# Medical Testimony to the Efficacy of **Sphagnol**

Dr. J. C. S. reports:—

"I have tried your Sphagnol Ointment and Soap in a case of chronic Eczema and Blepharitis respectively, and found their curative effects remarkable, and can strongly recommend them in all cases where other antiseptic preparations have failed."

Dr. H. J. T. reports:—

"I have obtained most excellent results in a case of Eczema affecting the entire body of an infant aged 9 months, by the application of Sphagnol Ointment you sent me for trial. I am very pleased with the Soap."

"I have tried your Sphagnol preparations, ointment, and cream in certain chronic ulcers with remarkable success, and have recommended Sphagnol to a large number of people under training as a valuable first-aid dressing for wounds."

SPHAGNOL has now been used by the medical profession for many years with unqualified success. It has proved of extraordinary value in the treatment of difficult cases of skin disease and inflammation. Throughout the war its healing properties were found to be of the greatest benefit. Sphagnol is an antiseptic distillate of peat, and is prepared in the form of Ointments, Soaps and suppositories.
