# MALTINE

is the well-known nourishing digestive food. The continued

excellence of "MALTINE" depends on:—

1. Its unusually high diastatic activity
2. Its nutrient and body-building properties
3. The bone-forming and tonic properties of its mineral content
4. Its high calorific and energising value

"MALTINE" is about ten times as valuable as a flesh former than ordinary Malt Extract, about five times as valuable as a starch digestant, and five times as valuable as a heat producer

"MALTINE" helps growth and development of children and improves the physique

"MALTINE" with Pepsin, etc. A powerful digestive for dyspepsia, etc.

"MALTINE" with Hypophosphites. The best all-round tonic

"MALTINE" with Paraffin (Powder Form). The best laxative for young or old

## Saving the Coal Bill

Pumice Concrete Boilers have been found to possess remarkable advantages over the ordinary copper boiler. No coal is needed! They burn anything and heat up with remarkable rapidity because, pumice being a non-conductor of heat, no heat escapes. For these reasons hundreds of new homes that are now being erected are having

### The HUDSON REINFORCED PUMICE CONCRETE BOILER

Saves time, saves fuel, and—saves your temper. Reinforced with finest steel, it stands like a rock and will never crack or crumble as do the old style brick coppers. As permanent as concrete itself. Other advantages of this economic boiler are—

- No iron exposed to rust the clothes.
- Takes up less room than the ordinary copper.
- No heat being radiated—the washhouse keeps cooler.

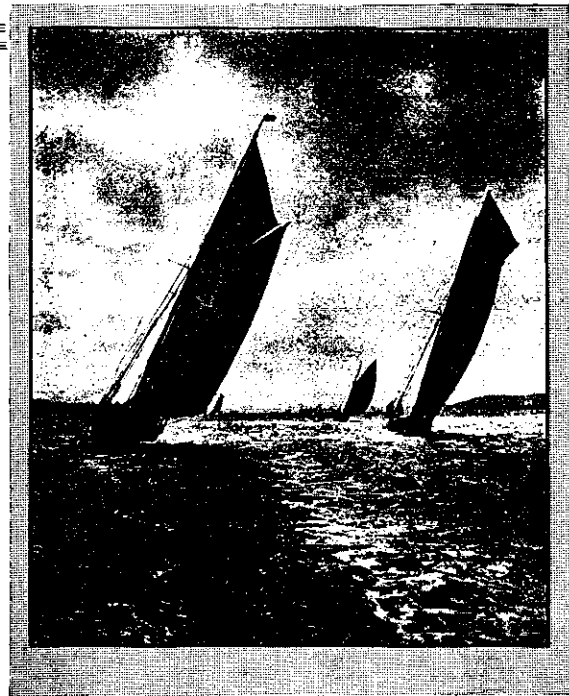

- Can be moved from place to place, wherever required.
- Can be left out of doors without any deterioration.
