

Perfect Development

is shown by this photograph of 'Betty' who has been brought up from birth entirely by the

'Allenburys'

Progressive System of Infant Feeding

During the first few months of her infancy she was given the 'Allenburys' Milk Food No. 1, which is practically identical with mother's milk *at its best*. At three months this was replaced by the 'Allenburys' Milk Food No. 2, which is essentially the same in composition as the No. 1 Food, but contains additional nutritive elements to promote healthy growth and development which take place rapidly at this stage. At six months of age when she was entering a new stage in her progress the 'Allenburys' Malted Food No. 3 was given. The next step was the 'Allenburys' Malted Rusks, which lead up to other forms of solid food.

A FREE OFFER

Upon receipt of a postcard mentioning Baby's age, Messrs. Sharland & Co. will be pleased to send you free of all charge, a sample of the 'Allenburys' Foods together with a copy of their book on 'Infant Feeding and Management.' The work has been compiled by a medical man, a specialist in all that concerns baby's welfare. The book is a veritable mine of valuable information; it deals exhaustively with the many doubts and difficulties which arise from day to day, the solution of which is necessary to ensure baby's health and future well-being.
