

What is already becoming common in our cities.

What a Temuka Farmer SAW!

A SUGGESTION TO EXTERMINATE THE MOVEMENT.

Hire fifty or a hundred of our ugliest and stoutest female citizens to walk in procession clad as reformed.

As a logical outcome, woman, having discarded her back hair and cumbrous nomenclature, will be known by an odd number, and man, converted to her views, will bear an even number. Particulars as to pedigree, etc., can be referred to in the archives of the state

The Temuka Leader is responsible for the following :- " Ever since the holidays, for some reason unknown the bush at Peel Forest has been overrun with what is commonly known as the advanced woman in pantaloon. Tents have been pitched in the bush, and here the feminine beauties disport themselves in real unconventional style, far from the haunts of men, although a few select members of the male sex who have conformed to the order are admitted within the sacred precincts. A good story is told of a Peel Forest resident—a regular old identity—who set out one day to 'beard the lion in his den,' being curious to know what kind of creature the advanced woman is. He got within a bird's-eye view of the row of tents, when to his intense surprise a sight met his eyes which he will never, perhaps, forget, and which sent him away in blank dismay. Right before him he beheld male and female alike in the reformed attire playing leapfrog over each other's shoulders."
