Idle Money.

Diamonds form one of the best investments of the present day. For some years past they have been advancing in value at the rate of ten per cent. per annum, and have every appearance of continuing to advance. What better secure investment can you get. No bank will pay you half so well. A piece of Diamond Jewellery bought from us at the low prices we offer must prove a sensible purchase, as diamonds never deteriorate in value, besides you have the satisfaction of wearing them while they are yearly becoming more valuable. Think it over. Then come in and select from our Matchless Diamond Stock.

Time is the Telltale.

No matter whether you pay 10/- or £10 for a Watch, unless it keeps time your money is thrown away. Its real worth depends, not upon what you paid for it, but upon its qualities in relation to price. Hundreds have tested and found satisfaction. Price, £4 10/-. Makes a handsome and useful Gift to your Daughter this Xmas.
