Musical Examinations.

RAM AND ROM. RESULTS.

The practical examinations conducted by the Associated Board of the Royal Academy of Music and the Royal College of Music, London, England, were held in Auckland last week. A departure has been made this year, all the candidates being examined at one centre—the Masonic Hall—instead of at the various schools of suusic as formerly. The houldest representative (Mr Hugh E. Cooper) has received from the examiner an interim repart of results, which er an interim report of results, which he has handed us for publication. The names of successful candidates in each names of successful candidates in each division are given in alphabetical order, and are followed by the names of teachers.

M. L. Webb), Beatrice V. Tucker (Mr. J. F. Bennett).

i Pleasure and Duty.

At the missionary meeting held in the Choral Hall, Auckland, last week, Bishop Neligan quoted some very striking figures for the purpose of contrasting the sucrifices made by the general public for pleasure with those that they make for more serious and important objects. The Bishop's stallistics are units and for pleasure with those that they make for more serious and important objects. The Bishop's statistics are quite sufficiently impressive to prove his case without any exaggeration; so that we need not hestitate to point out that the figures he has given as to the totalisator investments are misleading. At the last summer specifing of the Auckland Bacing Club the gross amount put through the totalisator is officially given at nearly \$2.70,000. But exceptedly knows that most of this money is turned over several times; and the most liberal estimate that we believe can be made for the total sum actually expended in this way is from \$2.2,000 to \$15,000. The Auckland Cup, we understand, usually attracts more investors than any other race here; in fact, we may reasonably infer that a majority of those who backhoves during the meeting put something into the "machine" for the Cup. On last year's Cup the total investment was \$2,000; and this fact may serve to indicate that the figures quoted from the "machine" returns for one day, or for the whole meeting do not really represent the actual investment of more than 25 or 30 per cent. of the nonjust total. However, admitting all this, as we have sent the actual investment of more than 25 or 30 per cent. of the nonjual total. However, admitting all this, as we have said, Bishop Neligan's case is sufficiently strong. It is undequiable that the four days' racing at Ellershe at the year's end costs the community for gambling alone far more than is paid to the Anglican clergy of the diocese for looking after the moral and spiritual interests of the community for a whole year. Nor after the moral and spiritual interests of the community for a whole year. Nor does the amount put through the totalisator represent anything like the total sum expended either by the public or the promoters of the sport. The prizes given by the Auckland Racing Club at the Summer meeting are worth over £9900. which is about eight times as much as the Auckland diocese gave for Home, Maori and Foreign Missions for the whole of last year. Nor did the Bishop confine his comparisons to one field of sport alone. The annual income of the Auckland Rugby Union, as Bishop Neligan showed, is far more than the Church expends on any one of its missions for the year. These facts are not calculated to impress us with any strong

sense of our devotion to the religious sense of our devotion to the religious and philanthropic objects which the work of the Christian Church in all its forms represents amongst us. No doubt the statistics of other religious bodies here would reveal the same starlling contrast; and it reflects very little credit on the moral or intellectual condition of the community that is should be so. on the moral or intellectual condition of the community that it should be no. Excessive devotion to pleasure is always calculated to demoralise either the in-dividual or the society that it infects; and gambing more than any other vice specific corrodes away the indits of in-dusty and self-reliance, which are the only stable foundation for a strong and same necessitional classifier. only stable foundation for a strong and same personal or national character. As to the totalisator, it is somewhat remarkable that people should persist in putting money time after time into the "machine" with the certain knowledge that they lose 10 per cent, of it for the average gambler at every rate meeting. But the follies of gambling do not need any illustration from us; and we can only hope that Bishop Neligan's vigorous denunciation of the wills may encourage the community to devote a little less time and money to pastimes which even when they do not demoralise should never be permitted to exclude all should never be permitted to exclude all the most important considerations in

A RAINBOW IN THE MORNING.

The old weather prophet, who was also a poet, said that

"A rainbow lu the morning ... Is the shepherd's warning."

It is true also in health forcecasts that the morning feeling affords a very fair index to your general condition. If you rise in the morning with a headache, a tired feeling, a bad taste in the mouth, a foul tongue, a bad appetite for breakfast, and a general sense of gloom, weakness and unfitness, then you should lose no time in trying Bile Beans. Ton may obtain a free sample box from the Bile Bean Company's De-pot, 39, Pitt-street, Sydney, by enclos-ing a penny stamp to pay return post-age. The only condition imposed is that you mention the name of this pa-per.

NO CURE. NO PAY.

R will Cost you NOTHING to Try Our IMPROVED and PATENTED ELEC-TRIC BELTS for NERVOUS and OFFI DISPANS. Sand for one AT ONCE, and DAY for in within three brooths after you are NATISFIED your CURK is PERMANENT.
