The company assembled shortly before 8 o'clack, and were received by the host and hostess at the first landing of the staircase. From her first landing of the staircase. The Y.M.C.A. There were many young men who compied bedgings, and this place should be a been to them. He thought if business men and firms employing young nen could only see the advantages of such an institution, they would more practically support it, for surely a young fellow placed under such circumstances as the Y.M.C.A. constituted must at least be freer from the temperations which existed in a city like Aodebard which existed in a city like Auckland, To young men the institution offered To young men the institution offered many advantages. Among these he might mention that there were 7000 branches of the Y.M.C.A. in various parts of the world, and franking tickets were issued to any member leaving the place, which secured him a welcome in any one of these institutions. They would see what an advantage this was to young men travelling or changing their place of residence.

After the President's address, which was warmly applanded, many of the guests wended their way to the supperroom, which was situated apstairs. Here light refreshments in every variety were light refreshments in every variety were
