tragedy; but the hearer fet alenced from over criticism by thase hard blue eyes. It would be eacless she felt to say any "Rather awkward," assented Isobel coldy, hoping to chack the conversation. But Mrs. Vansitiart was, like most convalescents, garruloca. "If think it is very hard on me," she continued plaintively. "It puts me under such an obligation and he has no business to do that. It is on a par with his not marrying again-:" she moved restlessly, and should settle her pillows, her lips set with anger. "You see," went on the pretty plaintive voice, "It was really very unkind of him, for there was no real reason why he shouldn't; and men generally do. It would have made me so much happier-happy as I was with my lost one"— here the tears began to roll down the pretty checks that were fast recovering their roundness, their pinkness. "And it isn't as if, we were ever fond of one another. He married me just to take care of me, I'm sure, and I was so young and I wanted a protector. It was due to the act of wife for him at all. He requires someone not so good look-ing and more reliable-a gint more like you-what is the matter, nurse, you've upet the eart-de-cologue?" More than that was upset, and those clear complacent eyes took in the fact with a cretain amusement; having lived on simulated emotion all her life, she was quick to recognise the real thing. "You came out with John in the same ship," said Mrs. Vansittart the next day. "He told me." And then sudent with

"Really! Miss Vansittart!" began Isobel hotly, then paused, feeling frankly that it was useless to try and get inside that armour of unconscious zetfishness. "I don't suppose you will understand," she continued haughtily, "but I hold it wrong for divorced persons to marry; and no matter how i loved a man—" "Then you do love him," interrupted the sweet womanly voice, "I am so glad. And I quite understand-quite! I wouldn't do it myself-I-I wouldn't indeed, for I think just as yon do-and of couse real love is divine in its origin, only—" there was a pause and a distinct

The very walls of the room seemed to rock: and close in on isobel Graham's amazement. "Not married?" "Not I thought I was of course. Surely I need hardly say that! But when I met Dr. Forde I was a widow—such a young widow, and quite forlorn. The main I had married was perfect wretch and had described me, and I'd seen his death in the papers. But he wasn't freatly dend then. After I had heen inarried three years, he wrote me as letter, and you can't think Miss Graham how awful it wast I didit's know what to do. I couldn't face my friends; and d waj the centre of such a charming society: everyone admired met. So I sent him money; and then he really did die. It was such a relief. But still couldn't be happy. I know I was not really married, and I couldn't tell John. And then my darling—he was hard, you know—came into my life and it ai seemed so dreadful, so truly dreadful! And then this story about that other woman turned up. I don't know fit it was true; perhaps it wasn't but in India it is so common you know fuct quite unmoved. --and John was miserable—I anw I yas runing his life—and you see. I hadn't an self-complayency could not face thy glub the to do that—no right at all-so—" The voice paused again; even th calm self-complayency could not face thy But by this time isobel Graham had frecovered herself. "So you divorced him knowing he was not guilty."

pettishly. "You don't understand. He didn't really mind; besides if he had, he wouldn't really have had the right cither. It was all so confused—and any how I did it for the best—I did indeed."

how I did it for the best—I did indeed." Isobel Graham stood speechleis, her hands pre-sed to her forehead. Confusel! The word did not express the utter obfuscation of thought which was hera. John Forde was undoubtedly free; but ou the other hand he had not known he was free. All his actions stood in the same light as they had done before—or did they not? She could not decide, she could not think. She could only say with what purpose was left to her— "Thank you the is enough. If you

"Thank you, that is enough. If you what purpose was left to her— "Thank you, that is enough. If you say any more, I will go out of the room." Only one thing seemed clear to her our reflection. John Forde, whatever his faults, had been shamefully betrayed by the woman he believed to be his wife. To save her own petty self-esteem she had accused him of a crime—at least of something—of which, possibly, he was not guilty; and she had certaily branded him as a divorced man. He had acquiesced — more shame to him; but for all that she, Isobel Graham, had misjudged him as the rest of the world misjudged him and now, knowing the truth, she owed him an apology. So much seemed clear. He was booted and spurred for his

The was booted and spurred for his ride across the desert when she began her stammering ambiguous words. He cut them short with a tightened clasp of the hand he held in good-bye greeting. "So Helen has told you the truth," he said swiftly, his face lighting up, his quick genius for diagnosis coming to his aid unerringly. "Hasn't she?". "She told me," began isobel cautiously, remembering the confidential character of her knowledge, but again he was too alert for her, and his face softened. "Poor soul," he said gently. "I hardly expected she ever would. It isn't in her, you see. And it was desperately hard and rough on her—" "Then you know? faltered Isobel,

you see. And to the and rough on her-" "Then you know! faltered Isobel, "you knew all the time-" "Of course I knew. The man wrote to me also; and I was just going to speak to Helen when the beast-he was a beast-died. And then-then it was for her to decide-you see, my dear, J-I am not very orthodox. I'm sfraid-me much. She wasn't happy, I wasn't bannt-our so-called marriage was a marriage or no marriage didn't trouble me nuch. She wasn't happy, I wasn't happy-our so-called marriage was a mistake; but I felt bound to her, so I left it to her. I was a bit flabbergasted at her method of shunting me, I own. But it didn't seem to matter really; you see I never expected you would come along, my dear-take care, clild!". For Isobel Graham had collapsed hope-lessly at the very feet of the strong square man, and was weeping silently as she looked up in his kindly face. "Poor little woman," he said as he stooped to raise her and hold her, fast-"You see I couldn't tell you, could I--besides-" a slight sadness came to his voice, "you condemned me unheard! However! That's over, I suppose?". "Yest it's over," said Isobel Graham in a muffled voice-her lips were pressed on the lapel / of John Forde's white drill coat, just above his heart-"but I wish you hadn't-mo!-John't you are the best, the kindest-" "The doctor pushed her from him in alarm, and looked anxionsity in her face

the best, the kindest—" The doctor pushed her from him in alarm, and looked anxiously in her face. "You don't feel ill do you? Not that's all right, I thought you were talking a bit wild, that's all."

A Murder Every Day.

What is the matter with Jefferson County, Alabama? The Birmingham, Alabama, "News" tells us that during the year 1912 there was a murler every week day in the year. This has been about the average for some years past, but with a tendency to grow worse, while during the first nincicen days of the present year there were ten murders and eleven deaths from "unknown ramses." There are more murders comand eleven deaths from unknown ranses." There are more murders com-mitted in this one county than in the whole of Great Britain, including Lon-don, a fact not surprising when we learn

that in 1912 only one man was executed for murder, and he was a negro. There seems to be no common cause for these seems to be no common cause for these murders, except that human life is lightly considered and that the law is despised. The frontier settlements in the West were once anyposed to hold the record for bloolshed, but any description of a frontier community that tolerated a murder every day would be laughed at as fanlastic. And yet this very state of things exists in Ala-bama and without any of the excuses that existed in pioneer days, and before the law of the land could effectively assert itself.

The Message of Sanatogen.

"Sanatogen undoubtedly invigorates the nervesbraces the patient to health-brings a new hopefulness and enjoyment of life."

These words, written by Lady Henry Somerset, will come as a stirring message to all who are in that miserable despairing state of mind which is due to weakened nerves and failing health. Such sufferers should seek at once the helpful, uplifting power of . Sanatogen.

New Health and Nerve Power.

Over 15,000 qualified practising physicians have testified in writing to the great benefit which their patients have derived from Sanatogen in Nervous and Digestive Troubles, Brain-fag, Iusomuia, Poverty of Blood, and various Wasting Diseases.

Sanatogen is unique among tonics because it invigorates the whole system-particularly the nerves and brain-not temporarily, but permanently, and without any harmful effects. In the words of the well-known physician, Dr. Claude L. Wheeler: "Sanatogen is a food-a highly concentrated and very nutritions foodendowed with special tonic properties. It builds up, fortifies and strengthens the cells of the body, because it is a real cell food."

Sanatogen can be obtained of all Chemists, in tins of three sizes.
