A PRETTY FACE

is often spoilt by the unsightly appearance of SUPERFLUOUS HAIR. Ladies cannot be too careful about what they use for this trouble. Most depilatories burn and mark the skin in a terrible manner. Science has made rapid strides, and we now have a preparation called

I-SO-LA

which will prevent hair growing, or if it has already grown, I-SO-LA will instantly remove it. This preparation is guaranteed not to mark or burn the skin, and its use cannot be detected. A few applications will entirely destroy the worst growth, and in some instances only one application is necessary. Price, 4/6.

Good Sense and Complexions

Miss Agnes Despres.

Even in the search for beauty science is spreading the doctrine of good sense. Instead of clogging their pores with cosmetics, the clever women of today are adopting the "absorption method." This means only that they remove, by a gentle process of absorption, the soiled and faded outer complexion, which, for some reason, nature has caused to throw off in the manner natural to a healthy, youthful skin. Every woman has a lovely, fair complexion just underneath the sallow and stained outer one.

To remove this stifling veil of darkened, ugly complexion, smart women simply use pure Jettalline as if it were cold cream. It absorbs the devitalised outer complexion and removes it in ten, microscopic flakes in a few days' time, thus revealing the beautiful young complexion underneath. There is no inconvenience.

If you wish to prove this for yourself, it is only necessary to get about 30 grammes of Jettalline from your chemist and apply it at night like cold cream. It is harmless, painless, and not at all unpleasant, and the improvement it develops is enough to make any woman's heart glad.
