**MESSRS. BROWN BROS., LTD.**

Mr. John Arnold, representing Brown Bros., Ltd., of London and Paris, has arrived in Auckland with a fine range of samples of accessories and fittings for motors, motor cycles and cycles. Among other lines represented is the "Brolt" Dynamo Car-lighting Set, which is worked automatically and can be switched on separately or collectively, and should the tail light of a motor car be extinguished it is shown in front of the driver by a red light, which indicates the absence of a tail light. Mr. Arnold can be found at the Express Co.'s Central Sample Show Rooms, Room No. 15, where members of the trade will be cordially welcomed.

To say that the upper reaches of the Wanganui River—in fact, the whole river—are now teeming with magnificent trout is no mere figure of speech. Numbers are caught from the decks of the house boat and from motor canoes and row boats kept at the house boat for the convenience of visiting fishers. A gentleman staying at the house boat last week states that the size and the large number of trout was surprising. Visitors sit in the evening in their deck chairs and watch the trout rising and jumping, similar to schools of porpoises, but, of course, smaller in size. The opinion of Mr. Wodley Prouse and others who annually visit Lake Taupo, and have fished on the Wanganui, is that the Wanganui, already so famed for its scenic attractions, will, when known better, become one of the finest trout streams in the world. In the House Boat-Taumarunui section of the river service the boats on the up-trip are stopped frequently and trout caught by both crew and passengers.

**BARTON, MCGILL AND CO.,** Billiard Table Manufacturers (Gold Medalists), 422 Queen-street, Auckland. Requisites always in stock.
