

**BUSINESS ITEMS.**

**MESSRS. D. FLYNN AND CO.**

**COACH AND MOTOR BODY BUILDERS.**

Messrs. D. Flynn and Co., of Elliott Street, Auckland, draw attention to their advertisement appearing in this issue, and a visit paid to this establishment by our representative confirms the fact that this is a progressive firm and quite up-to-date in all its methods. Messrs. D. Flynn and Co. are men of practical experience in their own individual branches, and the firm is well known throughout the Auckland province for thorough and practical workmanship. The premises, which are admirably suited for vehicle and motor building, are situated in Elliott Street, covering a considerable portion of land, and a visit to this establishment is well worth the trouble. The coach factory is well stocked with all classes of farming implements and vehicles for pleasure, business and farm purposes, and the proprietors claim that added to the benefits of first-class workmanship, there is the inestimable advantage of carefully selected material only used in the construction of all work executed by them. Messrs. Flynn and Co. have recently added a new branch of industry to their factory, and that is that of motor body building and painting. Motor bodies of every design are regularly constructed, both standard or original, and the firm build to any specification that may be submitted. Motor lorry bodies have formed a special feature of their business, and they are prepared to submit plans and specifications and estimates for any special kind of motor lorry designed to carry a maximum load. Motor painting is another feature of this firm's business, and motorists can be assured that all work entrusted to Messrs. Flynn and Co. will be capably carried out.

**SHEEP DIPPING.**

Nothing affects a farmer's income more than the rise and fall of the wool prices, and whereas clean, bright staple tops the market, dirty and coarse stands on a lower rung. As the sheep-dipping season is now approaching, a few words on sheep dips and sheep-dipping may not be out of place. The first consideration is the kind of dip to use. There need be no hesitation in this respect, as all practical sheep-farmers know that dips containing carefully prepared compounds of arsenic—we are not speaking of home-made arsenical dips, or those prepared by novices—are by far the most lasting in their effects, as they not only kill the ticks and lice, but destroy the tick eggs. No other kinds of dips will do this. Sheep farmers should therefore be careful to ascertain that the dips they intend purchasing are arsenical dips, as other dips will not keep sheep clean from dipping to shearing. Another thing to avoid is a dip which stains the wool, as wool buyers always knock off something when buying dip-stained wool. The next point to consider is whether a dip is easy or difficult to use. Some dips are very troublesome in the using, but effective, and others are easy to use, but not lasting in their effects, while others again are both easy to use and lasting in their effects—these are the liquid arsenical dips. The best of all dips is one of the last-named class, and this dip is Murton's, which is as easy to use as a non-poisonous liquid dip and as lasting in its effects as a powder dip. Very many of the firm's clients state that at shearing time they have a difficulty in finding any ticks on the sheep or even on the lambs. This dip also leaves the wool in perfect condition. The wool expert's report on the "Hiku" clip was that it was a "perfect clip," and this flock was dipped with Murton's dip. Last season all the top prices were wools from sheep dipped with this celebrated dip. The subject of cost is also important, and in this respect Murton's is the lowest priced of all high-class dips.

**HALF A MILLION CASH REGISTERS.**

**THIS NUMBER SOLD IN LESS THAN FOUR YEARS.**

**IT REQUIRED 27 YEARS TO TURN OUT FIRST MILLION.**

On June 10th the National Cash Register Company shipped register No. 1,500,000 to Fred Dundee, proprietor of a garage in Portland, Oregon, U.S.A.

Although it took twenty-seven years to build the first million registers, the last five hundred thousand have been manufactured in less than four years.

Here are the typical years in the Company's growth:—

Year.	Registers.
1885	514
1886	1,050
1887	1,995
1888	4,296
1889	6,561
1890	9,091
1895	14,610
1900	39,587
1905	61,005
1910	129,068
1913	145,020

National Cash Registers have gone to every part of the world. They are used in eight different countries, and record 33 kinds of money. They are used in the largest and finest stores, as well as in the smallest; in the store farthest north, and in the store farthest south.

The N.C.R. Company was organised in 1884, and it first only occupied one room. Two men and a boy were the only employees. As late as 1895, the one thousand mark had just been passed, the employees at that time numbering 1198.

From this small beginning has grown a business which has had as many as 7600 workers at one time. Ninety trades and vocations are now represented among the employees.

The first user of a cash register said: "What is good for many, is good for every merchant in the world." That remark has echoed and echoed in every nation, and it is still one of the best advertising slogans the company has developed. Probably no company in the world has greater confidence in its product than the N.C.R. The world is its market.

Along with its successful campaign to market its product, the register company has not forgotten its employees. Not long after the establishment of the plant, the owners realised that they could make no better investment than to do everything in their power to protect the health and general welfare of its employees. Since that time every employee has been considered an integral part of the institution. His work, his environment, his difficulties, his well-being, have been studied. Light, sanitation and ventilation have been developed as fine arts.

**£8,600,000 IN WAGES.**

In wages and salaries, the company is said to have paid out in the last ten years approximately £8,600,000.

In quantities of materials used some startling facts have been gathered which will be of interest:—

One thousand carloads of coal are used annually.

About 226,400 pounds of tin and over 7,000,000 pounds of grey iron castings are used in a year.

Over 12,500 pounds of steel are used in a year. One hundred miles of railway tracks could be made with the steel used annually.

Close to 600 carloads of timber are used annually in the manufacture of registers, measuring over 8,000,000 feet.

Over 5,700,000lbs. of paper are used each year. This would run an eight-page daily newspaper with a daily circulation of 90,000 for one year.

Six million pounds of copper and other foundry metals are used each year; 1,250,000 pounds of brass and bronze sheet, rods and tubing; 720,000 locks; 138,000 pounds of lead, and 310,000 gallons of oils, acids, etc.

Nature's sweet face is decked with jewels rare. She weaves glad garlands in her sunny hair. She is a lady, fair beyond compare. But man is subject to her darker moods. So to the rescue comes the cure of "Woods." The Peppermint Cure is really "just the goods."

**Murton's Dip**

**NEW TESTIMONIALS:**

**JNO. MOORE, Esq., RIVER BANK, RISSINGTON, H.B., August 12, 1915.**

I have used your dip for close on 30 years, and it has always given me satisfaction. The mixing is no trouble, and when dipping is finished there is no (dip) sediment to throw away. It destroys all vermin and leaves the wool in good order.

NOTE.—Mr. Moore was the first sheep farmer to use our Dip.

**JNO. D. MCGREGOR, Esq., HINAU PEMBERTON, July 27, 1915.**

I have used Murton's Dip continuously for 21 years and have always found it satisfactory.

**W. S. MARSHALL, Esq., Maungaraupi, RATA, July 23, 1915.**

I have used Murton's Dip for about 15 years and it has always given me complete satisfaction, and I shall continue to use it.

**E. N. LIPPITON, Esq., WANGANUI, July 9, 1915.**

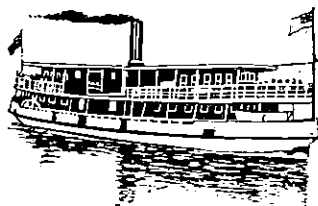

Murton's Dip has been used on my station for the past 6 or 7 years and my managers have always reported upon it favourably. I am quite satisfied it is a good dip and do not desire to change for any other.

**A. TUCKER, Esq., WAIMAMAKU, HOKIANGA, AUCKLAND, April 2, 1915.**

I have used your Dip for over 20 years and it has given every satisfaction.

**J. M. METCALFE, Esq., MATAKOHE AUCKLAND, September 14, 1914.**

When I get a good thing I like to stick to it. I have used other dips, but the wool was so harsh after using them that I thought I would try another and that was yours, it gave me every satisfaction, so I have been using it for about 20 years.

**THE DEVONPORT STEAM FERRY COMPANY, LIMITED.**

**STEAMERS:** Ngairo, Peregrine, Albartross, Kestrel, Condor, Sparrowhawk, Goshawk, Eagle, Osprey, Britannia, Victoria, Takapuna, Lyttelton, Pelican, Young Bungaree, Kawau, Ruru, Merlin.

**PILES.**

**INTERNAL, EXTERNAL, BLEEDING, AND ITCHING CURED BY "THE ZANN DOUBLE ABSORBING TREATMENT" WITHOUT OPERATIONS, CUTTING, SATURING, CAUSTICS, OR CRUSHING.**

Piles are divided into two classes, internal and external; both classes frequently causing intense pain, itching and bleeding. External piles may be either cutaneous (that is usually in the form of distinct tags) with unbearable itching and pain, or thrombotic (for the reason that they are caused by a blood clot), with acute inflammation, swelling and pain. Internal Piles are much more serious than external Piles, and frequently life is endangered, cases being known in which from half to one gallon of blood had been lost at one time, leaving a mass of tissue known as the hemorrhoidal mass. This mass always protrudes, and through friction becomes much ulcerated. Only you who suffer know the agonising pain, the sleepless nights and the miserable days which accompany this condition. Avoid operations, cutting, ligaturing and caustics. They are drastic measures, which are rarely successful. You really can be cured easily and quickly by using the "Zann Double Absorption Treatment." The first application gives instant relief, and a general improvement sets in at once. Don't delay. Write to-day to the "Zann" Proprietary, 66, Lambton Quay, Wellington, enclosing postal note for 4/6 and receive in plain wrapper per return post a full treatment, and cure of internal, external, bleeding and itching piles. All correspondence is strictly confidential, and each treatment is guaranteed to cure, or your money instantly returned.

Note Address—The Zann Proprietary, A. 66, Lambton Quay, or Box 348, G.P.O., Wellington, N.Z.
