# Car Lighting and Starting

Motorists from the Old Country will recognise the scene as the Village of Amersham, Bucks. The building in the far distance, 375 yards from the car, is the old town hall, built by Sir William Drake in 1682. The width of the beam of light is 35 yards.

Is right in front for starting efficiency and light-giving capacity, and behind it stands the name of Vandervell. From the dynamo to the battery, the battery to switchboard, the switchboard to head, side, tail and interior lamps, it is a thoroughly sound system ; a system, too, which is equally suitable for every style and type of car.

BRITISH made from BRITISH materials  
by BRITISH labour on BRITISH soil.
