FEEDING TOMOANA DAIRY RATION *now* puts the cows into top gear so that they make the fullest use of the grass when it comes away.

Hundreds of successful dairy farmers have proved that the early spring feeding of TOMOANA DAIRY RATION gives results *right through the milking season*. It's not just the extra production at the time that makes it worth while: it's the extra production for all the months ahead that counts—made possible by building health and stamina at the critical time.

Remember that, whatever their natural productive capacity, your cows will only produce to the full if their protein feed is ample for the job.
