

I'm protecting
profits by
using the

ELASTRATOR

method—

Castrate Calves, lambs
without setback—use

ELASTRATOR

and the Rubber Ring.

Calves on the bucket or on the dam castrated with the Elastator Rubber Ring go ahead without setback. The younger the better. Safe, bloodless, simple and effective. Widely acclaimed by American and Australasian cattlemen.

Sheep too! The ELASTRATOR is made to order for dairy farmers who run small flocks. Simply carry the ELASTRATOR and rings in your pocket, apply rings to new born lambs—the castration is easy, bloodless and effective.

But I've switched off..

Maybe you have, but

ACID ACTION

doesn't stop then

It's just as much a menace to an idle engine as under the toughest of heavy duty conditions.

Shell X-100 Motor Oil contains additives which neutralise corrosive acids and make the oil spread evenly and firmly, clinging to the metal, whether the engine is switched off, or toiling under heavy duty conditions.
