*Fully Automatic Wire Tie*

**OLIVER Model 100 BALER**

New . . . completely automatic! For big capacity production . . . speed and economy, you can't find a finer, more durable baler than the new Oliver Model 100.

Here is a baler that really saves. The floating pick-up unit is leaf tight . . . saves those valuable protein-laden leaves. Wire threading takes less than 5 minutes . . . saves you precious field time. And, Oliver's short knot is turned in so it won't snag . . . Come in and see the new Oliver 100 Baler. Inspect the sturdy "straight through" construction. See the "out-of-wire" signal system that automatically stops the engine when the wire runs out. Note, too, the four synchronized feeding units that give the Oliver 100 Baler extra tonnage and speed.

### Bounty on Opossums killed

The campaign against the opossum has been so successful the Government has decided to continue the scheme until 31st March, 1954. There are three ways in which trappers can obtain payment for opossums they kill.—1. By sending to Dept. of Internal Affairs, Govt. Bldgs., Wellington, tokens (in consignments of not less than ten) for which bounty of 2/6d. per token will be paid. 2. By selling skins to a buyer at best prices obtainable which should not, in any case, be less than 2/6d. nett. 3. By submitting to public auction through a recognised broker when the return to the trapper cannot be less than 2/6d. nett. (The minimum selling price has been fixed at 2/9d. from which brokers are entitled to deduct commission on a maximum of 2/6d. only).

Full details of scheme are presented in a pamphlet obtainable from District offices, Lands and Survey and Internal Affairs Depts., N.Z. Forest Service, City Councils, County Councils, Catchment Boards, Acclimatisation Societies.
