

## A MIRROR FINISH YOU CAN SEE YOUR FACE IN!

The amount of fuel injected for each power stroke of your diesel must be very accurately metered.

To ensure this, the pump elements of your C.A.V. Fuel Injection Equipment have the highest degree of precision finish known—a mirror finish.

Air-borne dust that gets into the fuel will score this perfect surface, reducing efficiency and ultimately bringing the motor to a standstill.

You can't always keep out the dust but you can filter it out of the fuel with the new C.A.V. Paper Element Filter—the greatest advance in fuel filtration yet discovered.

KEEP A MIRROR FINISH IN  
YOUR DIESEL FUEL PUMP
