

"Paint it with

LUSTAR

and you'll double its life!"

That goes for gates, yards, fences, buildings, trailers, implements, silos, horse-, cow-, and stack-covers, tarpaulins, etc., etc.

Since first marketed in 1944, Lustar has made firm friends all over New Zealand, because of its simplicity in use, and reliable performance. Lustar Improved Tar-Base Paint is equally good for metals, timbers (including pinus), or fabrics. In black only: Gallons 25/-; 4-gallons 80/-; 45-gallon drums (railage free) £30.

Order from your Stock Firm or Hardware Dealer.

3. FORESTS ARE CROPS

Forestry is farming on a large and long term scale, with a crop of trees in place of grass and sheep. The New Zealand Forest Service is responsible for administering over nine million acres of forest reserves. Just as the farmer selects stock and crops, considers climate, geography and soil types so does the forester use scientific research in planting, tending and harvesting a crop which may take fifty years or more to reach maturity. In the case of Kaingaroa, largest single logging enterprise in the Southern Hemisphere, forest planning visualised from the first planting the ultimate utilisation of this area—the milling and processing for domestic use and export of the many manufactured products which today use timbers as a raw material.

Forestry is forever
