with

Wipe out deep-rooted perennials — keep ground bare of vegetation.

Along fence lines, round farm buildings, in pens and yards, in drainage and irrigation ditches . . . wherever weeds and grasses menace the smooth running of your farm, destroy them with concentrated BORASCU or POLYBOR-CHLORATE. Both are non-selective, in that they destroy *all* weeds and grasses . . . leave the ground bare and one application may last for years.

BORAX CONSOLIDATED LIMITED

For fuller information and for the name of your nearest dealer write to F. T. Winters, P.O. Box 3433, Auckland.

Concentrated BORASCU is safe and easy to apply; nothing to mix, no water to haul.

POLYBOR-CHLORATE is safe, fast-acting, free of fire hazard. It is highly soluble for spray application; gives quick knock-down to tall standing weeds. **NON-SELECTIVE . . . NON-POISONOUS . . . NON-TOXIC TO LIVESTOCK.**
