

*Put "bloom" on Show
cattle with*

While important to all farmers wherever supplementary feeding is required, "Dominion" Linseed stock foods are particularly valuable, because of their high linseed content, in the preparation of show stock.

Linseed imparts bloom; gives coats a glossy appearance; has a relaxing and laxative effect which puts stock in peak condition for early shows.

"Dominion" Stock Foods are available in two types; genuine PURE LINSEED Kibbled Nuts or Linseed based pellets . . . both suitable for stall or yard feeding.
