CONSTANT investigation has been made to find an article perfectly adapted for preventing the excruciating pain caused in extracting teeth. Its value, as the best dental obtundent ever known, has been fully demonstrated by the severest tests, time having also served to confirm the most sanguine expectations. Among its numerous advantages especial attention is called to the following:—

- First.—It produces entire insensibility to pain during the extracting of teeth—a thing never before accomplished without danger.
- Second.—Its action is confined entirely to the teeth being operated on; it does not benumb any other organ.
- Third.—It contains no deleterious substance.
- Fourth.—It is no way injurious to the health.
- Fifth.—It is perfectly harmless in every respect, and no accident can ever occur through its use.
- Sixth.—It enables the operator to do his work in less time and in a better manner.

Seventh.—The mental torture and unnatural strain upon the nervous system of the patient, produced by constant expectation and dread of pain, are entirely avoided.

Eighth.—It advertises itself, as every patient on whom it is used is sure to become an ardent advocate of its truly wonderful merits.

ARTIFICIAL TEETH.

To this, the largest and most important department, special attention and critical examination is invited in reference to shape, color, translucency, and vital appearance, and in contrast with other teeth in comparison with strength, lightness, and adaptability.

From a determination to do work of a higher quality and better finish than has ever been placed within the reach of patients, no efforts have been spared to get out all that skill, ingenuity, and patient industry could produce.

Advantages of Superior Dental Work:—

- First.—It is much stronger and lighter than usual.
- Second.—It is free from injurious ingredients, and therefore healthful, and most unlikely to cause inflammation.
- Third.—It is cleanly and beautiful in appearance.
