PIA JUSTITIA.

FRIDAY, MARCH 21, 1890.

## PROGRESS AND JUSTICE IN THE NINETEENTH CENTURY.

THE Catholics of New Zealand provide, at their own sole expense, an excellent education for their own children. Yet such is the sense of justice and policy in the New Zealand Legislature that it compels these Catholics, after having manfully provided for their own children, to contribute largely towards the free and godless education of other people's children!!! This is tyranny, oppression, and plunder.

## A PHENOMENON.

It is very noticeable that in all the recent speeches of Members of Parliament to their constituencies the education question has been entirely ignored. We draw attention to this in order that Catholics and others who are injured by the present outrageous and godless system of education may take note of this fact and consider what their future action ought to be under the circumstances.

We observe that a good deal has been said in the speeches to which we refer on the land question, but it is not quite certain that there is not much sincerity in much that has been spoken on this subject, particularly by the Members who wish to pose as Democrats. The people ought to narrowly scan the policy of their Members. Is it not plain that in the past the people have been treated as if they were shuttlecocks, so far as the land question is concerned; and that, notwithstanding all the parade that has been made in the direction of liberal and wise land laws, somehow or another the land for the most part still continues locked up in the hands of large holders and financial companies? The people are in reality treated as if they had neither brains nor pluck. The whole policy of various succeeding Governments and Parliaments seems to have been to prevent the people to any great extent from being placed upon the land. No doubt from time to time some little settlement has taken place. This had to be effected to keep the people quiet. Nevertheless, settlement on the land has not been such as it ought to have been. The best land remains locked up, extravagant prices in the interests of large proprietors have been sought after, and the Government itself, by insisting on extravagant valuation for the purposes of the Property Tax, has done its best to maintain this state of things. But whilst the difficulty of obtaining land at a reasonable figure continues unabated, chiefly owing to the policy of Government, the injustice and folly of the present education system do not seem to concern either Members of Parliament
