

His Lordship, at the termination of the concert, thanked the children for the beautiful entertainment they had given, and said that he had only missed two of these annual concerts during his long sojourn in Auckland. He remarked that each year the entertainment seemed better than the preceding one. His Lordship regretted that his multifarious duties prevented him visiting the school more frequently. The distribution of prizes then took place. There were twenty-three successes in the musical department, and in the Sixth Standard ten received proficiency and three competency. At the conclusion of the distribution, the visitors were invited to the study hall, where there was an exhibition of paintings, carving, bird, plant, and distinguished works, the result of the year's work of the pupils.

The following was the prize list:  
D. Ferguson, gold medal (presented by Right Rev. Dr. Lenihan) for Christian doctrine; Patricia O'Connor, gold medal (presented by Mr. Kohn) for music; G. Evans, gold medal (presented by Mr. P. Darby) for conductivity; G. Lawry, gold medal (presented by Mr. M. Casey) for conduct; B. Lawry, gold medal (presented by Mrs. T. O'Connor) for diligence.

Matriculation and Civil Service Class.—English, D.

White 1, A. Ferral 2; mathematics, C. McLeod; arithmetic, J. Ferguson; geography, C. Lawry.

Higher Sixth Class.—Aggregate merit, D. McStay; essay—P. O'Connor 1, S. Young 2; arithmetic, L. Bolton; and R. Shirley; English, D. Ferguson and Rosie Ralph; drawing—E. Kelly 1, B. Lovell 2.

Lower Sixth Class.—Aggregate merit, D. Sneddon; arithmetic E. Tanner and M. Noton; application, M. Ralph; essay, C. Little; drawing—S. Fraser 1, Master D. Dalaney 2; general proficiency, D. Laing.

Fifth Class.—Aggregate merit, Rena Ralph; drawing, P. Darby; arithmetic, D. Miller; essay—K. Kelly 1, P. O'Connor 2; reading, S. Ralph; writing, M. McVeagh; English, G. Darby; general proficiency, M. Finane and A. McConville.

Fourth Class.—Aggregate merit, E. Lynch; arithmetic, Maurice Flynn 1, S. Noton 2; geography, M. Hahn; English, L. Harris; history, S. Tanner; recitation, P. Whitefield.

Second Class.—Aggregate merit, R. Foster; arithmetic, M. Casey, N. Kelly, and M. Cardon (equal) 1, K. Brunton 2; English, E. White; reading and recitation, Y. McVeagh; general proficiency, D. Cardon and M. Ryan; writing, E. Yells; reading, K. Keightley.

First Class.—Aggregate merit, G. White; reading, N. Sneddon.

Primary Class.—Aggregate merit, V. Sneddon; writing, M. Barnes; reading and spelling, L. O'Connor and M. McKay; arithmetic, M. Flynn 1, M. Casey 2; drawing, J. Finane; arithmetic and tables, R. Stone; reading, C. Yells; spelling, J. McKay; tables, A. O'Connor.

Special prizes for Christian doctrine.—Patricia O'Connor, B. Lawry, M. Ralph, P. Darby, L. Harris, S. Noton; R. Foster, K. Brunton, Y. McVeagh, M. Barnes, A. O'Connor.

Music.—D. White, G. Evans, A. Ferral, D. Ferguson, D. McStay, R. Shirley, S. Fraser, P. Darby, G. Darby, M. McVeagh, S. Ralph, D. Sneddon, M. Noton, E. Lynch, I. Tanner, M. Hahn, L. Harris, I. Noton, E. White, E. Miller, K. Kelly, Y. Evans, M. Casey, R. Foster. Singing: I. Chick.

Drawing.—G. Evans, D. Bolton, C. McLeod, G. Martin, E. Tanner, A. O'Connor, Rosie Ralph, D. Sneddon, M. Flynn, Master Maurice Flynn, E. Yells.

Physical Culture.—E. Kelly 1, I. Chick, E. Lynch; E. Cardon.

Ambiability.—I. Chick, A. Ferral, G. Martin, L. Tanner, Brush Work.—I. Young.

Needlework.—I. Chick, L. Bolton, E. Tanner, G. White, Rena Ralph, I. Noton.

Diligence.—Dave Malavey.

Wood Carving.—E. Edmonds.

Neatest and most orderly pupils.—I. Chick, R. Foster.

Kindergarten.—C. Yells.

Certificates for Standard VI.—J. Ferguson, C. Adkins, M. Barnes, D. Brich, M. Connor, R. Shirley, I. Young, D. McStay, E. Kelly, L. Bolton, D. Ferguson, Rosie Ralph, B. Lawry, R. Lovell.

Hon. Mention for Music.—L. Bolton, G. Martin, I. Young, L. Tanner, R. Lovell, M. Cardon, D. Sneddon, E. Yells, Master M. Flynn.

Hon. Mention for Bookkeeping.—C. McLeod.

WHEN TRAVELLING AVAIL YOURSELF OF OUR CHECKED BAGGAGE SYSTEM as now carried out from door to door between the principal towns of the Dominion. It frees you of all trouble. Call or ring up, and we'll arrange to collect, check, and deliver your baggage. THE NEW ZEALAND EXPRESS CO., LTD. Offices throughout the Dominion.

BEST PRICES AND BEST SERVICE. Built to Order. Comes in Suitcases and Boxes.

WANTED KNOWN THAT Bill-heads, Circulars, Cards, Programmes, and General Printing of every description are executed at the Tablet Office. Moderate rates.

100W RTWINDA MOTTA & YOKO

W.M.D. The following tonic lotion for the hair is highly spoken of:—Vinegar of cantharides, 4dr.; tinct. of rosemary, 4dr.; glycerine, 1dr.; rose water, 8oz. Rub this well into the roots of the hair every night without fail.

House Plants.  
To produce an abundant growth, water them once a week with lukewarm water, to which a very little ammonia has been added.

Silver Trimming.  
Silver dress trimming may be cleaned by covering the trimmings with dry magnesia. Let it lie for two hours, rub carefully and gently, and then brush off with a hard brush.

A Greasy Sink.  
A greasy sink is an abomination, and to avoid it rub about the sink a handful of salt two or three times a week with the scrubbing brush. This will remove any grease, and keep the sink smooth and clean.

A Blackleading Tip.  
The best way to save time and labor in blackleading is to moisten the blacklead with ammonia; when a most brilliant and lasting polish will be the result. The grate never looks grey after it has been done in this way, and will last much longer bright.

Worth Knowing.  
Very few people know how much better varnished wall papers look if occasionally wiped over with a cloth wrung out of paraffin and warm water—a quarter of a pint of paraffin to a bucket of water. Use a soft cloth, wrung fairly dry, and afterwards polish with a dry duster.

White Furs.  
Furs will not be in such demand now, and before putting them away they should be freed from dirt, which attracts moths. To clean white furs, warm a quantity of bran in a clean pan in the oven. Stir it occasionally to prevent it burning. When well warmed, rub it thoroughly through the fur. Repeat two or three times, then shake the fur well to free it from all dust. Before laying away, wrap the fur securely in brown paper, which protects against the intrusion of moths.

How to Keep Down the Coal Bills.  
The following method uses up the 'slack' which accumulates in every household, and is at the same time a good way of using up quantities of waste paper. Put the paper into a pail of water, let it steep a little, then squeeze into loose balls. Place these on a clear, low fire of cinders—or coke will answer. On the paper balls throw coal dust mixed with cinders. Leave the fire untouched for hours. When poked it lights up into a warm, glowing fire. This is a splendid way when a fire is required to be kept in all night.

The Husband with a Hobby.  
There is no mistaking the husband with a hobby; he is usually too enthusiastic to be passed over. By a hobby is meant the love of following some useful pursuit which takes his thoughts off his work and keeps him well employed. Hobbies have frequently been the means of providing an additional source of income, as well as a source of happiness. A man with a good sensible hobby makes a good husband. He is fond of home, for his work in spare time keeps him there. The hobby should make for usefulness, and if it tends to bring a little gain to the mill so much the better, for the wife and children will also reap the benefit. Wives should encourage their husbands to have hobbies providing they can take an intelligent sympathy and interest in the diversion, and also provided that heavy expenses are not involved.

To Cream Madras, Muslin, Curtains.  
Madras muslin is greatly favored for curtains and looks well for a very long time if carefully laundered. Many people object to the colored starch sold for creaming curtains. They can be done at home to look like new in the following way:—Procure a pound of yellow ochre. It can be bought at any chemist's and is very cheap. Mix about two tablespoonfuls of the powder (more or less according to the depth of color required) with thin smooth paste with a little cold water, and add to the hot water starch, which should be made as usual. This is excellent for coloring curtains, and it will be found after one or two attempts just the proper amount of color is used. A pound lasts for so long, so it is a very cheap coloring.

MINING SPOTS IN CHINA.

Large pieces of fine China clay are found in the following districts:—  
1. Shantung.—This district is the chief producer of China clay in China, and is situated in the northern part of the country.

2. Kiangsu.—This district is situated in the southern part of the country, and is the second largest producer of China clay in China.

3. Fukien.—This district is situated in the southeastern part of the country, and is the third largest producer of China clay in China.

4. Canton.—This district is situated in the southwestern part of the country, and is the fourth largest producer of China clay in China.

5. Kiangsi.—This district is situated in the central part of the country, and is the fifth largest producer of China clay in China.

6. Kiangsu.—This district is situated in the northern part of the country, and is the sixth largest producer of China clay in China.

7. Kiangsu.—This district is situated in the southern part of the country, and is the seventh largest producer of China clay in China.

8. Kiangsu.—This district is situated in the eastern part of the country, and is the eighth largest producer of China clay in China.

9. Kiangsu.—This district is situated in the western part of the country, and is the ninth largest producer of China clay in China.

10. Kiangsu.—This district is situated in the southern part of the country, and is the tenth largest producer of China clay in China.
