Plates that Defy Detection

THE crowning feature of good Plate-Work is its nearness to Nature—a desirable result only achieved by careful study and perfect methods.

My Plates are guaranteed to give absolute satisfaction. They are made by a most ingenious machine to an even thickness throughout, and are moulded to conform minutely to every line and curve, every depression and elevation of the mouth.

Another feature upon which I specialise is in the Beauty of the Teeth supplied. Only Special Anataform Teeth are used—Teeth that look natural because they are built on Nature's plan. Perfect in Shape and Colour. Strong enough for a lifetime's service.
