CHIROPRACTIC

THE SCIENCE THAT PROPERLY APPLIED BRINGS HEALTH

When a patient comes to a Chiropractor seeking relief from his disease, the Chiropractor makes an analysis of his case, determining what function is affected, how it is affected, and what causes it to be affected. He then proceeds to restore health by removing the cause of the disease, because permanent health cannot be established unless the cause of the disease is removed. The Chiropractor claims that it is more rational and more scientific to remove the cause of disease than to treat the effects of this cause—the disease itself—because wherever there is a cause there must be an effect.
