

THE "NOTT" Chemical Fire Engine.

THE CHEMICAL FIRE ENGINE is an established fact. Introduced in the first place as a sort of "first aid," to hold a fire in check while the water was being brought into action, its use has developed until fully half the outbreaks, in cities where it is available, are absolutely controlled by the Chemical. Here is a handy Chemical for small towns, villages, factories, isolated country houses, etc. Two men can handle it easily. It is ready for work on the instant. In 5 seconds it is throwing a jet 40 to 50 ft. from the nozzle. Each gallon of the Chemical fluid is worth 50 gallons of water. No fire can live under it.

No skill required to operate it. It generates its own pressure without burning any coal or gas to heat it up. A charge of chemicals costs about 5/- and may save thousands of pounds. We have them in stock for immediate delivery.

Booth, Macdonald & Co., Limited,
SOLE AGENTS,
