THE PETTY-JOHN COMPANY

Manufacturers of CONCRETE MOULDING MACHINERY. Terre Haute, Ind. U.S.A.

Make Concrete Building Blocks with PETTY-JOHN MACHINERY. There is an opening in every town for this wonderful new industry. Any man anywhere can easily establish himself in an independent and profitable business making concrete blocks. Experience unnecessary. Sand, water and cement are the only materials required. Only small capital required at first, and easily expanded as business increases. Concrete Blocks need only an introduction to any community to become in general demand, as their beauty, durability and economy are recognised everywhere.

ADVANTAGES OF HOLLOW CONCRETE BUILDINGS :

Artistic appearance. Cheapness of Construction. Buildings warm in winter and cool in summer. Dry, ventilated walls, fire and frost proof. Insurance is cheaper. Require no painting or repairs. Blocks can be laid in the wall rapidly, and require but little mortar. Plastering may be done on the back of the stone, saving lathing. Free from rats, mice and vermin. Perfectly sanitary. Resists rain and dries quickly, while solid walls remain damp. Can be moulded into the most elaborate designs conceived by the architect. The stone is thoroughly durable, becoming harder with age. The hollow space is useful for inserting gas and water pipes, electric wires, speaking tubes ventilators, etc.
