

BRITISH Expanded Metal

Having been absolutely proved the most effective of all reinforcements for concrete work, is now to become also
THE CHEAPEST

The enormous demand for this material is due to the fact that every joint is an absolute bond and all in true tension

No Wires to straighten and crack concrete before tensile strength
of steel comes into play

The following Sizes always in stock—

No. 8 - - - Weighing 8lbs per square yard
No. 10 - - - Weighing 11lbs per square yard
Expanded Lathing for Plaster Work

OTHER WEIGHTS CAN BE ORDERED from the MANUFACTURERS
