DUST

and How
to Remove
It . . .

The Hydrovakum "Silent
Dustman" in operation.

This illustration shows our Flexible Nozzle, or Carpet
Sweeper sucking up a thick layer of flour from the carpet,
the flour having been put there to easily demonstrate the
efficiency of our Hydrovakum Silent Dustman.

All you have to do is to move the Carpet Sweeper over
the part to be cleaned and the dust disappears through the
Flexible Tube, which is connected to the Suction Pipe of
our Machine by a neat Hose Coupling in the hall.

No Machinery or moving parts required. Just
attach to water main. Any child can operate it.

Full particulars from the

Machinery Exchange
