

PROGRESS ARCHITECTURAL NUMBER

Camerated Concrete

OFFICES MANAKAU WATER SUPPLY BOARD, EPSOM, AUCKLAND
Architects—WILSON & MOODIE. Builders—C. J. BROOKS & SONS.

Extract of Napier Letter received 15th October, 1911, after the Napier Earthquake—
"There was not the slightest damage done to any of the buildings erected, or partly erected in **Camerated Concrete**, by the recent earthquake . . . The earthquake was one of the severest we have had for many years (damaging numbers of brick buildings). Architects are now quite satisfied with the stability of Camerated Concrete, and we are now confident that the success of this system is assured."
