It Stands to Reason

that "IRMO" Iron made from waste metal such as Horse Shoes, Agricultural Implements, Rails and the like which have received a certain "tempering" or solidifying of fibre by constant use, must be much higher in quality than that made from crude ore.

IRMO IRON

made in New Zealand, is used by the leading engineers.

MESSRS. A. & T. BURT LTD. of the well-known Engineering Firm of Dunedin, Wellington, Auckland, Christchurch, etc., write—

"We have pleasure in stating that after using a large quantity of your "IrmO" Brand of Wrought Iron both Angles and Bars, that the tensile strength, elongation, and ductility are in every respect satisfactory."

Send for Particulars.

Economic BLACKSTONE
 cannot be beaten for
Simplicity
Reliability
Durability
Ease of Operation
and Economy

These engines have a good reserve of power, and develop their rated horse-power at a low speed. They are therefore a bigger engine for the money than most. Can be fitted up for hoisting, pumping, well-driving, largely used for shearing and milking, and because of their simplicity are much appreciated by farmers.
