

LYSAGHT'S

“ORB”

Galvanized Corrugated Skylight Sheets.

ABSOLUTELY WATERTIGHT

No. 18, fixed.

No. 19, opening.

View of the Light showing the simple method of sliding on the frame which secures the glass.

These can be fixed with ordinary Corrugated Sheets and in the same manner. Galvanized after manufacture; unbreakable; no cutting or soldering. The glass can be easily fixed, without the use of putty by unscrewing two screws, inserting the glass, and re-screwing. The Lights are made same size as Corrugated sheets, and are fixed in the same manner. It is a boon to the Farmer. The Cheapest and Best.

FIXED LIGHT, not to open. illustration No. 18. in 6 feet long. 24 gauge sheet...

OPENING LIGHT, made to open for ventilating, etc., illust. No. 19. 6 feet. 24 gauge

THE DAYLIGHT AREA IS 36 x 18 INCHES.

The illustration No. 20 shows that the glass is secured by simply sliding back the frame and fastening it with two screws.

The sizes of glass required are:

For Fixed Lights 39 x 20½ inches

For Opening Lights ... 39 x 20½ inches

The Opening Light can be fitted with a Prize to open with a cord.

The Galvanizing after manufacture ensures durability: such Lights are incomparably superior to any made up of galvanized sheets, and absolutely unbreakable.

The prices are exclusive of glass; this should be purchased locally.

THE CHEAPEST AND BEST SKYLIGHT.

Obtainable from all Ironmongers and Storekeepers.
