

**The Home is Incomplete  
- unless equipped with -  
ELECTRIC LIGHT**

The home that depends for its lighting upon the dangerous and inconvenient methods of oil lamps and gas is incomplete.

A well-furnished home should be fitted with Electric Light, particularly when a complete home lighting plant may be so easily installed and worked.

**Light YOUR Home with the  
“ ANDERSON ”  
Electric Lighting Plant**

which is self-contained, simple and easy to run, and renders you independent of outside supply, whether you live in the city or in the back-blocks.

The running cost of a 30-light installation is only 2/6 per week. Are you lighting your home for less than that now?

No! Then why not light with the clean, safe, brilliant and convenient Electric Light?

Write for Booklet—“Electric Lighting in the Home”—asking for it puts no obligation upon you!
