

PEARLINE

Is a specially prepared WHITE JAPAN for high-class exterior or interior Decorative Work, and for Ship and Yacht Topsides and Cabin Work. It flows freely, covers a considerable area before setting, dries with a perfectly smooth, hard, and brilliantly glossy surface; it is extremely durable, and neither cracks nor discolours like ordinary enamel. Pearline can also be supplied in any Tint required.

Pearline is a first-class Enamel for Motor Cars.

Pearline Flat for Interior Work.

Where a brilliant surface is not desirable, an exquisite egg-shell gloss finish may be obtained by the use of Pearline FLAT, an article of equal durability and similar in all other respects to ordinary Pearline.

Extract from letter received re "Pearline" from a New Zealand Yachtsman:

"I must not forget to tell you that Pearline makes a capital job. Everybody admires it. I know of several boat owners who are using it now after seeing mine. The most surprising thing is what a lot it covers. My boat is 33 ft. long, with high top sides. I went round the boat with the Pearline once, also did a lot inside, and of the half gallon tin I still have a good half left yet."
