

Long Life

IS ASSURED to your Roof if you cover it with a material manufactured from ingredients selected with the utmost care, after searching scientific tests, and combined in a manner that has been proved satisfactory after exhaustive and long-continued experiments.

Certain-teed

Roofing is made under the above-mentioned conditions in the most extensive factories in the world, devoted exclusively to the making of roofing materials.

CERTAIN-TEED Roofing is a combination of mineral asphalts and selected cotton rags, and is put up in convenient sized rolls, ready to lay—1, 2 and 3-ply in thickness.

The only tools required for laying **CERTAIN-TEED** Roofing are a pair of hands, a hammer and a knife.

Samples and Literature concerning CERTAIN-TEED will be freely posted to anyone interested by
