

Maton

In an increasingly mass produced world, it's refreshing to find a guitar which continues to embody the quality which only a hand made instrument can produce.

Founded over fifty years ago, MATON guitars are today built with the same skill and craftsmanship which has made them the choice of discerning guitarists the world over. Each and every MATON guitar is lovingly assembled by hand from only the choicest Australian and overseas woods, carefully selected and matured to ensure years of full, round ambience, and a tone which improves with every passing day.

For too long these excellent instruments have been unavailable in New Zealand, but you can now treat yourself to the guitar you've always deserved at selected MATON dealers. Each guitar is guaranteed for two full years, and we are sure you will agree that a MATON is more than just a guitar — it's an investment.

But the best news of all is that prices start from only \$895.00 including GST.
