ZOOM

9002

ADVANCED GUITAR EFFECTS PROCESSOR

Never before has there been anything like this digital multi-effects processor & personal headphone studio. The tiny but powerful Zoom 9002 is crammed with an arsenal of 12 effects: including tube type analog distortion, two digital delays & two digital reverbs with up to 6 effects at once, plus stereo output & every effect has the 16-bit quality sound you've come to expect only from digital rack processors at least 3 times bigger & far more expensive. From the sweetest stereo chorus sounds to an incredible variety of distortions so that when you crank it up... well... it just sings. Simple as that! An amazingly versatile & strong session partner for guitarists.
