we understand YOUR PROBLEM

You need a regular fix of new music — and often! So here's how we can help: great introductory deals on leading edge albums like ...

Paw Dragline

If one new band breaks through the plethora of grunge this year it will be Paw. The most added band on American college radio. A wall of intricately webbed guitars, supported by a tight rhythm section, strong melodies and all guided by a passionate vocalist. Absolutely essential.

PJ Harvey Rid of Me

The band voted 'most likely to' by the critics last year fulfil their promise. Raw and uncompromising, Polly Harvey and her band are ferocious in the extreme. Check out the twisted version of Dylan's 'Highway 61 Revisited'. Not for the faint-hearted.

Utah Saints Utah Saints

The world's number one Techno/Rave act, kick arse with their debut album. Finely polished nineties electro-pop, packed full of naggingly familiar samples and hooks. Perfect for blowing up your car speakers. Features the major club hits 'Something Good' and 'Believe In Me'.

The Kentucky Headhunters Rave On!!

The kings of country rock return for their third outing. Still sporting their proud and original lineup, *Rave On!!* features their unmistakable warm, good-hearted music that was highlighted on their first two albums, plus a few revved up remakes of old chestnuts like 'Dixiefried' and 'Blue Moon of Kentucky'.

Ye hah!
