

## *Notable Acquisitions, July 2005 to June 2006*

A selection of notable acquisitions covering all the collections is listed in the *Turnbull Library Record* to alert researchers to newly acquired material judged to be of significant research value. Additions to existing collections are not usually listed, except where they add substantially to what is already held. For access to newly acquired collections the Library would welcome notification that access will be sought, preferably with an indication of a likely date. This will help staff in establishing priorities in processing collections.

Records can also be accessed electronically on the National Library of New Zealand's website at [www.natlib.govt.nz](http://www.natlib.govt.nz). Records of the unpublished collections appear on the Tapuhi database, and the published collections through the National Library of New Zealand Catalogue.
