

Maoris were then living. The proposal was taken up by the Maoris with very great enthusiasm. The carving was undertaken by Wero, Anaha te Rahui, and others of the Ngatitarawhai Tribe, with several well-known carvers of the Ngatipikiao Tribe. A large sum of money was collected from the neighbouring Maoris, many who were then employed by the Government as militia contributing a fixed proportion of their regular pay. The carving occupied between three and four years, and many of the side slabs were carved from the sides of famous old war-canoes which had been in the possession of the Maoris for generations, and which had been used against the Tohourangi at Te Arika, and which had been dragged overland into Tarawera Lake. The house was completed about 1871. The principal owner was Te Waata Taranui, elder brother of the late Pokiha Taranui (Major Fox). It was named Rangitihī, after the well-known hero of that name, who, next to Tama-te-Kapua, was the most renowned ancestor of the Arawas. The house was nearly 60 ft. long by 25 ft. wide, and had a height of about 18 ft. to the crown of the roof. In 1882 Te Waata died, and was buried within the veranda, or porch, of the house. An elaborately carved tomb, in true Maori style, was put up over the grave. This was subsequently acquired by Sir Walter Buller, and, after being exhibited at the Indian and Colonial Exhibition, was finally presented to the Trocadero, at Paris. During the eruption of Tarawera the roof of the house was broken in by the vast quantity of mud lodged upon it. The house was consequently taken down and removed to Maketu, with the intention of re-erecting it there, a project which, for want of funds, was never carried out.

*Papers.*—1. "Descriptions of New Native Plants," by D. Petrie. (*Transactions*, p. 390.)

2. "On the Volcanic Ash-beds of the Auckland Isthmus," by E. K. Mulgan. (*Transactions*, p. 414.)

---

FIFTH MEETING: 19th August, 1901.

Mr. James Stewart, C.E., President, in the chair.

Professor H. A. Talbot-Tubbs gave a popular lecture, illustrated with numerous limelight illustrations, on "Greek Painted Vases: their Importance, Form, and Design."

---

SIXTH MEETING: 2nd September, 1901.

Mr. James Stewart, C.E., President, in the chair.

*New Member.*—A. D. Austin, F.R.A.S.

*Papers.*—1. "On the Recent Statistics of Insanity, Cancer, and Phthisis," by Professor H. A. Segar. (*Transactions*, p. 115.)

2. "On the Flora of the District between the Manukau and Waikato," by H. Carse. (*Transactions*, p. 362.)

3. "Exhibition of Astronomical Photographs," by A. D. Austin, F.R.A.S.
