

## Research Notes

### Name Changes in the Orchid Genus *Corybas* Salisbury

By EDWIN D. HATCH

Laingholm, Auckland, S.W.4

[Read before the Auckland Institute, June 15, 1955; received by Editor, June 28, 1955.]

WHEN I described *Corybas saprophyticus* from Wellsford in 1950, I was unaware that Schlechter had already used that name for a quite different *Corybas* species from New Guinea. My name must be rejected as a later homonym under Article 74 of the International Code, and I propose using in place of it—

***Corybas cryptanthus* Hatch. New name.**

Syn. *Corybas saprophyticus* Hatch in *Trans. Roy. Soc. N.Z.* 79: p. 366. 1952 not of Schlechter in *Fedde. Repert Beitr.* 1: p. 21. 1911 (*Corysanthes saprophytica*) and *ibid.* 19: p. 22. 1924 (*Corybas saprophyticus*).
