

FIG. 3.—*P. mortoni* n.sp. A. Dissection of buccal mass and nerve ring from right side. B. Nerve ring reconstructed from sections. C. Reconstruction of the reproductive system. The various organs are shown in approximately correct proportions except the gonad in which the spatial relationships have been altered for clarity. D. An enlarged diagram of the main ducts of the reproductive system showing the direction of travel of the reproductive products; solid arrows, ova; dashed arrows, autosperms; dotted arrows, allosperms. For abbreviations see Fig. 5.
