

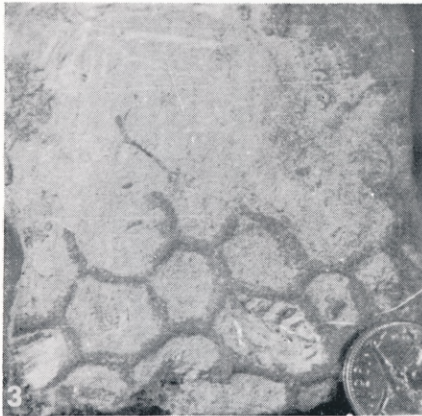

FIG. 1.—Anastomosing clusters of “flattened” (cylindrical) markings identified as *Phycodes*. Note faint impression of *Cycloichnus waitemataensis* left centre. (Grid reference N38/265888; compass gives scale.)

FIG. 2.—*Phycodes* in a little more detail. (Diameter of coin 19mm.)

FIGS. 3 and 4.—These unusual honeycomb-like markings are identical with the ichnogenus *Paleodictyon*. Comparisons can be drawn with *P. regulare* Sacco (X19, Fig. 3) and *P. meneghinii* Fuchs (X18, Fig. 4). (Diameter of coin 16mm.)
